

USAGE

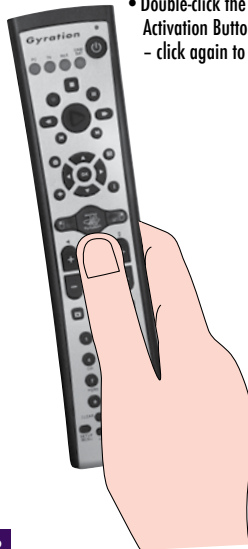

- Hold the remote using a relaxed handshake position. Use your thumb to access the activation button and to access the left and right buttons.

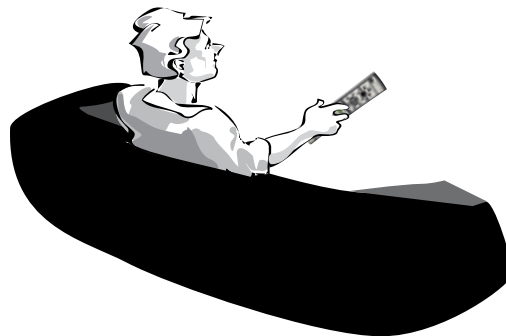

- Press and hold the activation button and move the cursor by flexing only your wrist while keeping your arm and body stationary.

- Double-click the Cursor Control Activation Button to keep it active – click again to de-activate.

- Sit back on your couch and relax. Place your arm comfortably on your armrest or in your lap and casually flex your wrist.

Gyraton Universal
Media Center
and PC Remote
Quick Start Guide

Universal IR Remote Functions

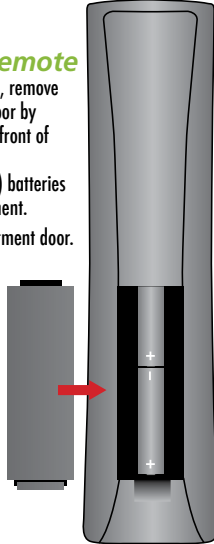

Congratulations on your purchase of the Gyratien brand Media Center and PC Universal Remote Control. This universal remote controls up to three electronic components using IR communication and many more through your Media Center PC using RF communication. You can program your Gyratien brand universal remote to operate most models of the most popular brands of infrared remote-controlled components manufactured after 1990. (See the enclosed Code Lists for a complete list of brands.) The universal remote is easy to use, easy to program and gives you control at the touch of your fingertips.

SETUP

Setting Up Your Gyratien Media Center and PC Remote

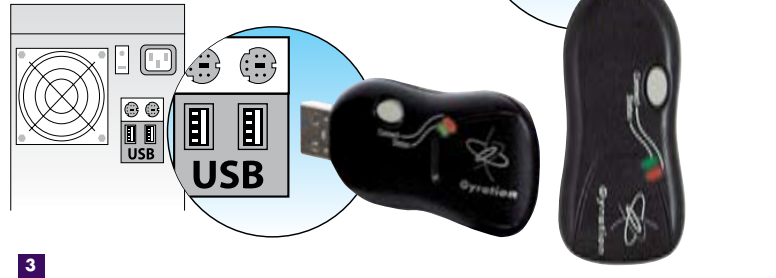

- On the bottom of the remote, remove the battery compartment door by pulling the tab towards the front of the remote and up.
- Insert two double "A" (2 AA) batteries as pictured in the compartment.
- Replace the battery compartment door.

RF Receiver Connection

- Make sure your Media Center PC* is powered on and running.
- Insert the RF Receiver into an available USB port on your Media Center PC*.
- USB extension cable may be used for maximum RF Receiver placement flexibility.

**You may use the Gyratien Media Center Remote on other systems with an available USB port with limited functionality.*

Connecting Your Device(s)

- Press the "CONNECT" button on the RF receiver to set it in "connect" mode.
- The connect light blinks.
- Press the "CONNECT" button on the Media Center Remote (middle button - bottom row)
- The connect light will stop blinking and stay on, indicating there is a connection.
- Follow these same instructions for any other Gyratien 2.4GHz product.

Please see enclosed Instruction Manual for more information on programming your remote for your A/V components other Gyratien 2.4 GHz products.
